

Internship Evaluation Report

Of

Web Development Internship

Submitted

To

School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech CSE

By

Roll Number of Student: CS-2341596

Name of Student: CHARVI GUPTA (7th Sem)

Batch: 2023-27

CANDIDATE'S DECLARATION

I, Charvi Gupta, do hereby declare that the internship evaluation report titled “Web Development Internship” has been prepared by me in fulfilment of the requirements for the award of the degree of Bachelor of Technology in Computer Science and Engineering at IILM University, Greater Noida.

The report presents the internship role, assigned responsibilities, learning objectives, scope of work, methodology, and expected professional outcomes based on the internship offer and the prescribed university report format. Wherever information about the organisation or internship assignment is presented, it is based on the supplied internship offer letter and the internship-report format.

I further declare that this report has not been submitted to any other institute for any degree or diploma requirement. I shall be solely responsible for any copyright violation or misrepresentation arising from material included in this report.

ACKNOWLEDGEMENT

I take this opportunity to express my sincere gratitude to everyone who has supported and guided me in preparing this internship evaluation report. I am thankful to the School of Computer Science and Engineering, IILM University, Greater Noida, for providing the academic framework and guidance required to undertake and document the internship experience.

I am grateful to Beast Learners for offering me the position of Web Developer Intern and for providing an opportunity to gain practical exposure to website development, maintenance, optimisation, user-experience improvement, technical problem solving, and collaboration on digital platforms.

I also express my gratitude to my faculty members, mentors, colleagues, and family for their encouragement and support throughout the internship period and during the preparation of this report.

INTERNSHIP COMPLETION CERTIFICATE

October 4, 2026

This is to certify that **Charvi Gupta** has successfully completed her three-month internship as a **Web Developer Intern** at **Beast Learners**, from **July 1, 2026 to October 1, 2026**.

During her internship, she contributed to the **development and enhancement of BeastOS**, the organization's digital platform, working on web development, feature implementation, and technical improvements. She demonstrated dedication, technical skills, and a strong willingness to learn throughout his internship.

We appreciate her valuable contributions to Beast Learners and wish her continued success in her future endeavors.

Sincerely,

Aditya Raj
Founder
Beast Learners

4. PROJECT DESCRIPTION

4.1 Introduction

This report documents the internship undertaken by Charvi Gupta (Roll No. CS-2341596), a B.Tech Computer Science and Engineering student of the School of Computer Science and Engineering, IILM University, Greater Noida. According to the supplied offer letter, the internship position was Web Developer Intern at Beast Learners for a period of three months, from July 1, 2026 to October 1, 2026.

The internship role was designed around practical web-development responsibilities. The offer letter specifies that the intern would assist with the development, maintenance, and optimisation of the Beast Learners website and related digital platforms. The assigned areas included implementation of website features, improvement of user experience, resolution of technical issues, support for backend and frontend development tasks, and collaboration with the team to enhance the organisation's online presence.

The internship therefore provides an industry-oriented context in which academic knowledge of computer science and web development can be connected with practical development activities, structured problem solving, attention to detail, and delivery within assigned timelines.

The report follows the structure of the university-provided internship report format and focuses specifically on the Web Developer Intern role described in the offer letter.

4.2 Organization Profile

The internship completion certificate confirms that the work also contributed to the development and enhancement of BeastOS through web development, feature implementation, and technical improvements.

The internship involved development, maintenance, and optimisation of the Beast Learners website and related digital platforms. The documented responsibilities included website feature implementation, user-experience improvement, technical issue resolution, and support for frontend and backend development.

Beast Learners is the organisation named in the internship offer letter. The internship was offered for the position of Web Developer Intern for three months, from July 1, 2026 to October 1, 2026.

4.3 Problem Statement

Modern organisations depend on websites and digital platforms to communicate with users, deliver information and services, and maintain an effective online presence. Such platforms require continuous development, maintenance, optimisation, and technical troubleshooting to remain useful and reliable.

The internship assignment at Beast Learners addresses this practical need through a web-development role involving the implementation of website features, improvement of user experience, resolution of technical issues, and support for both frontend and backend development activities.

The central problem addressed by the internship can therefore be stated as follows: how can an organisation's website and related digital platforms be developed, maintained, and optimised in a systematic manner while resolving technical issues and supporting a better user experience?

The internship provides an opportunity to approach this problem through practical software-development activities, collaboration, problem solving, and attention to quality and delivery timelines.

4.4 Project Objectives

- To gain practical industry exposure in web development within an organisational environment.
- To understand the development, maintenance, and optimisation of a live organisational website and related digital platforms.
- To assist in implementing website features according to assigned requirements.
- To understand and contribute to frontend and backend development tasks.
- To identify and resolve technical issues affecting website functionality or user experience.
- To improve understanding of user-experience considerations while developing or modifying website features.

- To strengthen problem-solving, debugging, attention-to-detail, and software implementation skills.
- To develop the ability to collaborate with a team and complete assigned work within specified timelines.
- To understand how technical contributions support an organisation's overall online presence.

4.5 Scope of the Internship

The scope of the internship is defined by the responsibilities stated in the appointment letter. It covers assistance in the development, maintenance, and optimisation of the Beast Learners website and related digital platforms.

- Website feature implementation and modification.
- Website maintenance and optimisation activities.
- Frontend development support.
- Backend development support.
- Technical issue identification and resolution.
- User-experience improvement activities.
- Collaboration with the team on digital-platform enhancement.
- Application of problem-solving and quality-focused development practices.

Documented Technical Areas

- Web development: contribution to the development and enhancement of the organisation's digital platforms.
- Frontend development: support for implementing website features and improving user-facing functionality.
- Backend development: support for backend development activities as assigned during the internship.
- Website maintenance and optimisation: review and improvement of existing website functionality.
- User-experience improvement: consideration of usability while implementing and enhancing features.

- Debugging and technical issue resolution: identification and resolution of issues affecting the digital platform.
- Testing and verification: review of completed changes to ensure the expected functionality and quality.
- Collaboration: coordination with the team while working on assigned development and improvement tasks.

4.6 Technologies and Tools Used

- Testing, verification, and collaboration on assigned tasks.
- Debugging and technical issue resolution.
- User-experience improvement.
- Website maintenance and optimisation.
- Frontend and backend development support.
- Web development and website feature implementation.

4.7 System Architecture

The internship work can be represented through a functional web-platform architecture centred on BeastOS, the digital platform identified in the internship completion certificate. The source documents do not specify the internal production architecture, programming framework, database, or hosting infrastructure, so this section describes the documented functional flow rather than an assumed technical implementation.

Conceptual flow: User → Frontend Interface → Backend/Application Services → Data/External Services, with testing, debugging, maintenance, and optimisation activities applied across the relevant layers.

4.8 Methodology

- Final verification: review completed changes and ensure that the assigned work meets the expected quality.
- Collaboration and review: coordinate with the team, incorporate feedback, and complete assigned work within expected timelines.
- User-experience review: consider usability and improve the experience of users interacting with the digital platform.
- Debugging: identify technical issues, investigate their causes, and implement appropriate fixes.
- Maintenance and optimisation: review existing functionality and make improvements where required.
- Development: implement assigned website features and contribute to frontend or backend development activities.
- Requirement understanding: understand the assigned website or BeastOS task and the expected outcome.

The internship work followed a practical, task-oriented web-development methodology based on the responsibilities stated in the offer letter and the work described in the completion certificate.

4.9 Expected Outcomes and Learning

- Development of professional confidence, technical skills, and willingness to learn.
- Improved teamwork, attention to detail, and ability to deliver work within assigned timelines.
- Better understanding of user-experience considerations.
- Improved technical problem-solving and issue-resolution skills.
- Experience with website maintenance and optimisation.
- Exposure to frontend and backend development tasks.
- Understanding of website feature implementation and enhancement.

- Experience contributing to a real digital platform, BeastOS.
- Practical experience in web development within an organisational environment.

The principal learning and professional outcomes were:

The internship resulted in practical exposure to web development and digital-platform work. The completion certificate confirms successful completion of the three-month internship and specifically records contribution to the development and enhancement of BeastOS through web development, feature implementation, and technical improvements.

4.10 Certificates and Communication / Mail Proof

Together, these documents provide appointment and completion evidence for the internship evaluation.

The original Internship Offer Letter is included as Annexure A as supporting appointment documentation. It confirms the role of Web Developer Intern, the internship period from July 1, 2026 to October 1, 2026, the principal responsibilities, and the monthly stipend.

The Internship Completion Certificate issued by Beast Learners is included in Section 3 of this report.

OFFER LETTER

To:
Charvi Gupta

June 20, 2026

Subject: Appointment as Web Developer Intern

Dear **Charvi**,

We are pleased to offer you the position of **Web Developer Intern** at **Beast Learners**, for a period of **three months**, from **July 1, 2026 to October 1, 2026**.

In this role, you will be responsible for assisting in the development, maintenance, and optimization of the Beast Learners website and related digital platforms. Your responsibilities will include implementing website features, improving user experience, resolving technical issues, supporting backend and frontend development tasks, and collaborating with the team to enhance the organization's online presence.

During the internship period, you will gain practical experience in web development, software implementation, and digital product management while contributing to real-world projects that support the growth of Beast Learners.

This is a **paid internship**, and you will receive a stipend of **₹5,000 (Rupees Five Thousand Only) per month** for the duration of the internship.

Your role will require technical proficiency, problem-solving abilities, attention to detail, and a commitment to delivering high-quality work within assigned timelines.

Further details regarding internship policies, reporting structure, working hours, and other terms of engagement will be shared separately.

We are confident in your abilities and look forward to your valuable contributions to Beast Learners. We wish you a productive and rewarding internship experience with us.

Sincerely,
Team Beast Learners
