Internship at a Glance

3 months

Duration

Web Developer Intern

Role

BeastOS

Digital Platform

01 Jul – 01 Oct 2026

Period

01

Internship focus

Contributed to the development and enhancement of BeastOS through web development, feature implementation and technical improvements.

02

Professional exposure

Practical experience in web development, digital-platform work, problem solving and technical improvements.

About Beast Learners

EDTECH

Education-focused digital platform

Beast Learners is an e-learning platform for ICSE & ISC board students, offering learning resources through its website and app.

Platform offerings

- Structured courses
- Detailed / short notes
- E-books and study materials
- Test series and quizzes

Digital learning ecosystem

- Learners access educational content and assessment resources digitally.
- The platform combines learning material with practice and evaluation.
- A reliable website/app experience is important to learner access.
- Web development therefore connects technology with educational delivery.

BeastOS & Internship Role

BeastOS

The organisation's digital platform

The internship completion certificate states that the internship contributed to the development and enhancement of BeastOS.

WEB DEVELOPMENT

FEATURE IMPLEMENTATION

TECHNICAL IMPROVEMENTS

Role responsibilities

- Assist with website development and feature implementation.
- Support maintenance and optimisation of digital platforms.
- Improve the user-facing experience.
- Resolve technical issues and support development tasks.
- Collaborate with the team to strengthen the online presence.

Problem Statement & Scope

Problem statement

An EdTech platform needs a dependable digital experience that can deliver learning resources, support new features and remain usable as the platform evolves.

Key challenge

- Implement improvements while maintaining existing functionality.
- Address technical issues efficiently.
- Balance functionality, usability and delivery timelines.

Internship scope

- BeastOS / website development
- Feature implementation
- Technical improvements
- Maintenance and optimisation
- User-experience support
- Technical troubleshooting and collaboration

Project Objectives

01

Gain practical experience in web development within an EdTech environment.

02

Contribute to the development and enhancement of BeastOS.

03

Implement or refine features according to assigned requirements.

04

Develop stronger technical problem-solving and debugging skills.

05

Understand the relationship between functionality, usability and user experience.

06

Learn professional practices around collaboration, quality and timelines.

Technologies & Technical Areas

01 Web Development

Development and enhancement of the web-based digital platform.

02 Frontend

Learner-facing interface and user experience.

03 Backend

Application-side functionality supporting platform features.

04 Feature Implementation

Building or refining platform capabilities.

05 Testing & Debugging

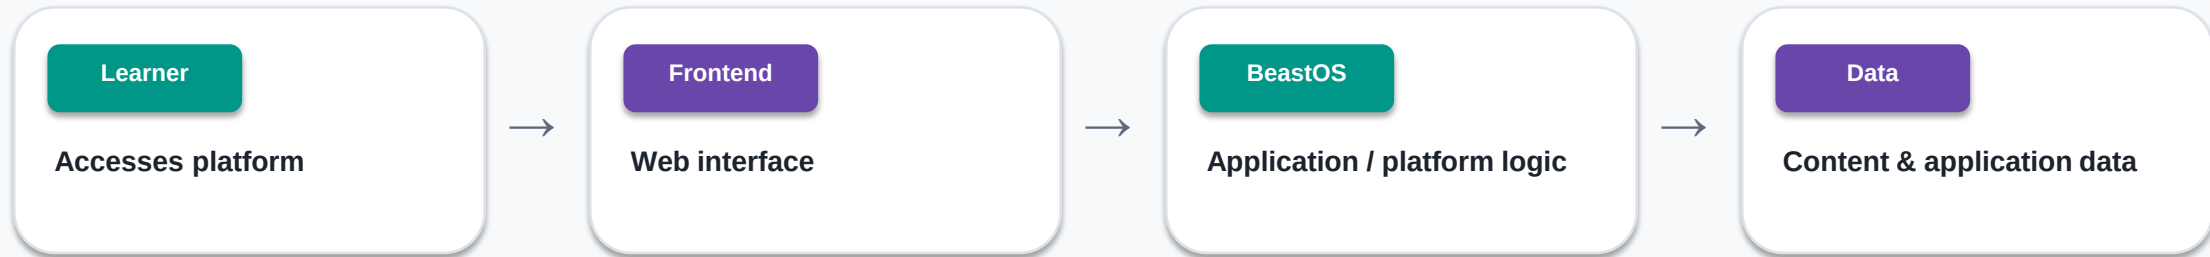

Identifying issues and improving technical reliability.

06 Technical Improvements

Optimisation and enhancement of the digital platform.

System Architecture & Methodology

Conceptual system flow

Development cycle

Key Outcomes & Internship Certificate

Key outcomes & learnings

- Practical experience in web development.
- Exposure to the development and enhancement of BeastOS.
- Experience with feature implementation and technical improvements.
- Improved problem-solving, debugging and technical confidence.
- Better understanding of digital-platform and user-experience considerations.
- Professional exposure to teamwork, quality and delivery.

THANK YOU

Web Development Internship
